!!! COMPUTER KNOWLEDGE !!!

- 1) In Word, what combination of keys do you press to delete an entire word?
Ans. Ctrl+Del
- 2) Plotters are very useful in applications such as
Ans. Computer aided design
- 3) A computerized business information system includes
Ans. Hardware, Software and Data facts
- 4) _____ is a type of network application software?
Ans. Web Browser
- 5) A hard disk has
Ans. 500 to 1000 tracks or more
- 6) Can Mail merge be used to print envelopes?
Ans. Yes
- 7) Can Mail Merge be used to print the form letters?
Ans. Yes
- 8) Overtime analysis is
Ans. Useful for formulating personnel policies. Derived from the payroll system
- 9) Can multiple worksheets be created and used at a time?
Ans. No
- 10) UNIX is
Ans. Both a time sharing and multiprogramming system
- 11) Which medium is universal, portable and inexpensive but has its own limitation in terms of storage capacity and speed?
Ans. Floppy Disk
- 12) Is printer an input device?
Ans. No
- 13) Personal computers currently sold in India have main memories at an entry level in the range of
Ans. Megabytes
- 14) Will UNIX provide better security for files relative to MS-DOS?
Ans. Yes
- 15) Which one of the items given below is not an item of the Menu Bar?
Ans. Root
- 16) The UNIX operating system (available commercially) has been written in
Ans. C-Language
- 17) Which type of errors is flagged by compilers?
Ans. Syntax errors

18) A CPU has a 16-bit program counter. This means that the CPU can address
Ans. 64MB memory locations

19) Who is called as "Father of Computer"
Ans. Charles Babage

20) PARAM is an example of
Ans. Super computer

21) Which holds the ROM, CPU, RAM, and expansion cards?
Ans. Mother board

22) CD-ROM is as a
Ans. Temp memory

23) The binary number system has a base
Ans. 2

24) GUI is used as an interface between
Ans. Software and user

25) E-mail is
Ans. Transaction of letters, messages and memos over a communication network

26) The operation carried out on an input data for checking its correctness and acceptability is termed as
Ans. Moderation

27) Which step is taken first in designing a program?
Ans. Problem identification

28) A flow chart is a
Ans. A method of displaying the solution to a problem in simple steps

29) The part of a computer system containing the circuitry that does the adding, subtracting, multiplying, dividing and comparing, is called as
Ans. Arithmetic – logic unit

30) HTML is a
Ans. Computer Language

31) In MS-Word "Mail merge" Command is available under
Ans. Edit Menu

32) Is HTTP is programming languages?
Ans. No

33) Since viruses are only a form of software, they primarily infect
Ans. Programs

34) What is the extension of file created in Power Point?
Ans. PPT

35) Which key is used for spelling and grammar checking?
Ans. F7

36) Data are

Ans. Raw facts and figures

37) Hardware that adds two numbers is

Ans. Arithmetic logical unit

38) Which is a Graphic package?

Ans. Corel DRAW

39) The scripts which are designed to receive value from Web users is

Ans. CGI Script

40) Is Page setup an option of Edit menu?

Ans. No

41) Which type of chart is used to show a correlation between two series?

Ans. Radar

42) A computerized business information system include

Ans. Modem

43) The purpose of the EXIT command is to

Ans. Get out of a condition loop

44) Wizard menu appears in the

Ans. Tools

45) The storage that supplements the primary internal storage of a computer is known as

Ans. Secondary storage

46) CD – Rom drive is used

Ans. To play compact Disc

47) The acronym "SWIFT" stands for

Ans. Society for Worldwide Interbank Financial Telecommunication

48) The World Wide Web is composed of

Ans. Millions of web pages

49) A computer that deals with physical quantities is know as

Ans. Analog Computer

50) Length of IP address is

Ans. 4 bytes

51) A data communication system requires

Ans. Terminal Device Communication channel and Protocols

52) Most common channel used by networks today is

Ans. Telephone Lines

53) Which is NOT a type of error?

Ans. Real time

54) A five-digit card attribute used for postal ZIP codes, it will be restored as
Ans. A numeric data

55) Which statement is TRUE about computer viruses?
Ans. It can be attached to an executable program

56) Which was the first operating system?
Ans. Monitor

57) The smallest space where information on a hard disk is kept in a
Ans. Cluster

58) An information is
Ans. Processed Data

59) Which is NOT a Characteristic of a computer?
Ans. Intelligence

60) Which is used to spend a digital signature?
Ans. Private Key

61) Negative Numbers
Ans. Can be represented in binary

62) Which is NOT an essential part of a computer?
Ans. VDU

63) Which is NOT a kind of printer?
Ans. Line Printer, Laser and Dot Matrix

64) Speed of clock of CPU is measured in
Ans. Megahertz

65) Pentium has _____ as microprocessor
Ans. IC 865

66) Which is NOT a secondary storage device?
Ans. Cache

67) Disk can be used to store _____ .
Ans. sequential Files

68) Which does from a part of CPU?
Ans. Control Unit, Hard Disk and Memory

69) Which memories can't be erased?
Ans. ROM

70) Which is NOT an application?
Ans. Windows

71) When taking the output
Ans. Information is produced in hardcopy and/or softcopy form

72) What is the control unit's function?
Ans. To decode program instructions

73) The most powerful type of computer is

Ans. Supercomputer

74) Which kind of ROM can be crashed by using electric current

Ans. ROM

75) GO TO statement is used in

Ans. C language, C++ Language, BASIC language

76) Which among is not a computer language?

Ans. C++

77) What is "Oracle"?

Ans. Database Software

78) What is "Full Aid"?

Ans. Sequential Circuit

79) Which among is must for computer?

Ans. Processor

80) Which part of a computer keeps "Permanent Memory"?

Ans. ROM

81) Screen Display is called by which name in Lotus?

Ans. WINDOWS

82) Which is a Computer Language?

Ans. PASCAL

83) What is expanded form of "IBM"?

Ans. International Business Machine

84) What is the full name of "CPU"?

Ans. Central Processing Unit

85) IC Chips is made of

Ans. Silicon

86) At which place is India's Silicon Valley situated?

Ans. Bangalore

87) Which is/are the storage device of computer?

Ans. RAM and ROM

88) Which is main work to create relation between Hardware and software?

Ans. DOS

89) What is LOTUS 1-2-3?

Ans. Software

90) _____ is a personal security code for GSM subscribers

Ans. Voice Mails

91) _____ holds actual data in the database.

Ans. Tables

92) Trojan is a

Ans. Virus

93) Which makes WEB insecure?

Ans. Static Keys

94) Which needs highest bandwidth

Ans. Video Signal

95) Which means communication between systems?

Ans. Connectivity

96) Which is NOT required for high-level language program before it is executed?

Ans. Controlling

97) _____ out of there roller are responsible for the movement of cursor on screen

Ans. 2

98) Hardware that adds two numbers is _____

Ans. Arithmetic Logical Unit

99) Which of the following is NOT done by Modem?

Ans. Data Accuracy

100) _____ is used for networks set up within a building

Ans. LAN
